

There are foes on all sides of us. There is nothing between us and our enemies except the Pacific Ocean and Atlantic Ocean. Look at what has happened to Belgium. Consider the fate of Serbia. Will you murmur about low wages when your country, your very liberties, are in danger? What are the miseries you endure compared to the humiliation of having a victorious German army sail up the East River? Quit your grumbling, get busy and prepare to defend your firesides and your flag. Get an army, get a navy; be ready to meet the invaders like the loyal-hearted freemen you are."

Will the workers walk into this trap? Will they be fooled again? I am afraid so. The people have always been amenable to oratory of this sort. The workers know they have no enemies except their masters. They know that their citizenship papers are no warrant for the safety of their wives and children. They know that honest sweat, persistent toil and years of struggle bring them nothing worth fighting for. Yet, deep down in their foolish hearts they believe they a country. Oh blind vanity of slaves!

The clever ones, up in the high places know how childish and silly the workers are. They know that if the government dresses them up in khaki and gives them a rifle and starts them off with a band and waving banners, they will go forth to fight valiantly for their own enemies. They are taught that brave men die for their country's honour. What a price to pay for a vague idea-the lives of millions of young men; other millions crippled and blinded for life; existence made horrible for still more millions of human being; the achievement and legacy of generations swept away in a moment-and nobody better off for all the misery! This terrible sacrifice would be comprehensible if the thing you die for and call country fed, clothed, housed and warmed you, educated and cherished your children. I think the workers are the most unselfish of the children of man; they toil and live and die

for other people's country, other people's continents, other people's liberties and other people's happiness! The workers have no liberties of their own; they are not free when they are compelled to work twelve or ten or eight hours a day. They are not free when they are ill paid for their exhausting toil. They are not free when their children must labour in mills and factories or starve, and when their women may be driven by poverty to lives of shame. They are not free when they are clubbed and imprisoned because they go on strike for a raise of wages and for the basic justice that is their right as human beings.

We are not free unless the men who frame and execute the laws represent the interests of the lives of the people and no other interest. The ballot does not make a free man out of a wage slave. There has never existed a truly free and democratic nation in the world. From time immemorial men have followed with blind loyalty the strong men who had the power of money and of armies. Even while battlefields were piled high with their own dead, they have tilled the lands of the rulers and have been robbed of the fruits of their labour. They have built palaces and pyramids, temples and cathedrals that held no real shrine of liberty.

As civilization has grown more complex the workers have become more and more enslaved, until today they are little more than parts of the machines they operate. Daily they face the dangers of railroad, bridge, skyscraper, freight train, stokehold, stockyard and training at the docks, on the railroads and underground and on the seas. They move the traffic and pass from land to land the precious commodities that make it possible for us to live. And what is their reward? A scanty wage, often poverty, rents taxes tributes and war compensations.

The kind of preparedness the workers want is reorganization and reconstruction of their whole life, such as has never been

attempted by statesmen or governments. The Germans found out years ago that they could not raise good soldiers in the slums so they abolished the slums. They saw to it that all the people had at least a few of the essentials of civilization: decent lodging, clean streets, wholesome if scanty food, proper medical care and proper safeguards for the workers in their occupations. That is only a small part of what should be done. It is your business to force these reforms on the Administration. Let there be no more talk about what a government can or can not do. All these things have been done by all the belligerent nations in the turmoil of war. Every fundamental industry has been managed better by the governments than by private corporations.

It is your duty to insist upon still more radical measure. It is your business to see that no child is employed in an industrial establishment or mine or store, and that no

work is needlessly exposed to accident or disease. It is your business to make them give you clean cities, free from smoke, dirt and congestion. It is your business to make them pay you a living wage. It is your business to see that this kind of preparedness is carried into every department on the nation, until everyone has a chance to be well born, well nourished, rightly educated, intelligent and serviceable to the country at all times.

Strike against all ordinances and laws and institutions that continue the slaughter of peace and the cruelty of war. Strike against war, for without you no battles can be fought. Strike against manufacturing scrap and gas bombs and all other tools of murder. Strike against preparedness that means death and misery to millions of human beings. Be not dumb, obedient slaves in an army of destruction. Be heroes in an army of construction.
